Code Rubric

Correctness

- [ ] Your program passes tests with no errors.

Documentation

- [ ] You have descriptive names for variables, functions, classes, etc.
- [ ] Your names are consistent with naming conventions (such as using capitals or underscores).
- [ ] Each function or class includes a comment explaining its purpose.
- [ ] Extra comments are included to elaborate on more involved sections of your code.

Style

- [ ] You use whitespace and comments to separate significant sections of your code.
- [ ] You use proper indentation.
- [ ] Long lines (70-80 characters) are broken up into multiple lines.
- [ ] You use proper structures, such as conditionals, loops, or functions, to avoid repeated code.
- [ ] Your code is concise and simplified where possible.
